

The Tumbler

achieves its distinctiveness by means of an engraved three dimensional H2Q star. Measurements prove that the Bovis value of water in the Tumbler H2QC increases after only a few minutes to more than 12,000 (a Bovis value of more than 6,000 is considered to be life-supportive).

The glass is especially appreciated as a support in a working environment.

(Ø 80 × 90 mm, 335 g)

H2QC

«The water from the tumbler tastes better to me. I have it with me at meetings.»

Urs, Manager, Zurich
